DATA PROCESSING

in business and industry

VOLUME 1

List of contents and subject index for 1959

The List of Contents gives the page numbers, titles, and synopses of all articles published during 1959—arranged in numerical order. An item in the Subject Index is cross-referenced to the List of Contents by the page number of the article in which the reference appears. For example, the item "Character recognition" is stated in the Subject Index to appear on page 10; reference to the List of Contents reveals that on page 10 will be found the article, "Automatic reading—a description of the first commercial automatic reading machine, which is to be used to extract information direct from printed cash-register tally rolls."

A QUARTERLY FOR TOP MANAGEMENT AND CHIEF EXECUTIVES

CONTENTS FOR 1959

Number 1 January-March

2 **Data processing**
the scope of the subject and the purpose of this journal

4 **The computing service**
how it functions and what it offers business and industry

10 **Automatic reading**
a description of the first commercial automatic reading machine, which is to be used to extract information direct from printed cash-register tally rolls

18 **The universal language of computing**
a simple explanation of binary numbers, binary arithmetic and decimal binary codes

21 **How an electronic digital computer calculates**
the function of the various units of a computer and a description of how arithmetical operations are performed

26 **Automatic programming**
a simplified technique of programming for electronic digital computers

30 **A review of electronic digital computers**
contains a short glossary of computing terms, an account of the work of the principal manufacturers and details of the computers they build

44 **Wage accounting and labour costing**
performed on a punched-card system that incorporates an electronic calculator

54 **High-speed printing**
photo-electric techniques used to print computer output data directly on to the appropriate forms

60 **Industrial inspection**
how modern methods developed in other fields can be harnessed to maintain continuous control of quality

Number 2 April-June

66 **For those thinking about installing a computer**
deciding whether a computer is appropriate or not: the steps necessary for achieving the best results where the answer is "Yes"

69 **A computer in a commercial organization**
the administrative problems that had to be faced and how they were overcome

74 **Producing 750,000 quarterly bills**
direct from meter-reading cards to the account presented to the customer

83 **Training future executives**
new technique for teaching the fundamentals of commercial management

86 **Punched feature cards**
a simple, inexpensive manual data processing system

94 **Leo in action as a sales administrator**
automatic financial control over bulk sales; automatic preparation of warehouse documents; automatic production of sales statistics

106 **A machine that learns from experience**
first practical use of the principle of mechanical learning

113 **Filing business data on magnetic tape**
making the most of the available storage capacity, thus enabling the computer to operate at maximum speed

120 **Rapid production of commercial documents**
a high-speed tabulator that can print 300 lines a minute

128 **Classifying information**
means whereby items and facts can be traced quickly and with certainty

Number 3 July-September

132 **Creating a comprehensive data processing system**
recommendations based on experience of electronic data processing systems in both the United States and Europe

137 **Prediction by computer**
methods that enable management to work out the most efficient means of organizing a new venture

142 **Visual data instantaneously**
ingenious closed-circuit television system for transmitting visual data that dispenses with the television camera

148 **How Raleigh Industries administer 250,000 credit-sale accounts**
an electronic computer performs all the routine work, including checking the accuracy of the information on the receipts issued by dealers. In addition, reminder letters for customers in arrears are produced automatically

158 **Robot bank clerks**
four machines designed to clear cheques and update customers' accounts

168 **Transferring work to a computer**
a brief outline, for management, of the planning stages that constitute the desirable preliminaries

170 **Numbers into graphs—and vice-versa**
machines that perform these tasks quickly and automatically

176 **Controlling production by computer**
using a computer to plan the production of a small factory, to measure the achievement and, where necessary, to initiate corrective action

190 **Edge-punched cards**
manual system for rapidly sorting and selecting data

Number 4 October-December

198 **Accounting machine plus paper tape punch**
how a small insurance organization now has rapid handling of its clerical work and, by passing the paper tape to a computing centre, statistics important to its future

204 **Automatic selection and reproduction of industrial documents**
composite system using microfilms, punched cards and xerographic printing

212 **Magnetic tape**
—the commercial document of the future—what it is and how it is used

222 **Accurate copy typing at 100 words a minute**
automatic typewriter operated by punched paper tape prepares all the lists and correspondence for an overseas staff payroll

228 **350 invoices a day and statistics**
how a manufacturing chemist uses a small punched-card installation to brief the salesmen, prepare order forms, invoices and despatch notes and produce sales statistics

238 **Continuous stationery**
points to consider in the design and handling of business forms printed as continuous stationery

247 **A mechanical filing system**
push-button machines which place any given set of cards in front of the operator within $2\frac{1}{2}$ seconds

250 **Job costing**
a small printing works' use of a 36-column punched-card installation

258 **Transistors**
a layman's guide to what they are and what they mean to the computer user

SUBJECT INDEX

Accounting and labour costing, wage 44
